

How to Strategically Use Data to Improve Your Cleaning Business

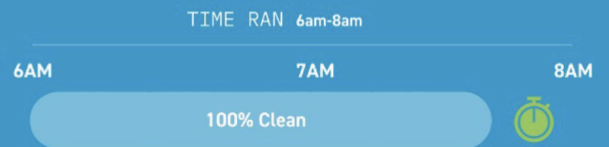

IN 5 SIMPLE STEPS

Collecting cleaning data provides opportunities to understand cleaning performance across facilities. Using cleaning equipment with fleet management software makes collecting cleaning data easy and helps businesses better understand cleaning performance across facilities. Although many cleaning businesses have access to cleaning data, analyzing this data can be time consuming and confusing. ICE Cobotics wants to help make analyzing and using the data simple.

USE THE FOLLOWING 5 STEPS TO GET STARTED:

Improve Processes

View cleaning data by staff member to identify highly productive staff. Use the data to replicate best practices across locations.

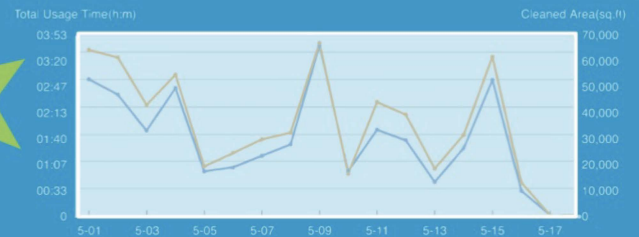

5000 sq. ft =
2 hours of clean time

Bid Jobs More Accurately

By tracking daily cleaning metrics such as location, sq. ft. cleaned, & time spent cleaning, you'll gain insight into how long cleaning takes at a particular site. Use this data to more accurately bid future jobs.

Provide Customized Reports

Work with your Client Care representative to build customized reports with data that is impactful to your business. Use your customized data to set goals and gain operational efficiency.

CONFIRMATION OF CLEAN

Download

Share Performance Updates & Gain More Clients

Easily share data & reporting that speaks to confirmed clean to create transparency & confidence with your clients. Clients will love knowing they'll get a confirmed clean report weekly.

Be More Profitable

Compare cleaning performance across all your facilities by looking at square feet and hours cleaned. Use this data to identify low performance & to create new cleaning plans that turn these sites into high performers.

1. Store 1 51,046 sq. feet
2. Store 2 38,208 sq. feet
3. Store 3 27,087 sq. feet

i-Synergy, by ICE Cobotics, is an exclusive fleet management software that allows you to use data and reporting to create and measure metrics that help you increase cleaning efficiency and manage your cleaning staff and fleet.
