

PROPERTY MANAGERS

Spot Trends Through Cleaning Data and Optimize Building Performance

2 CLEANING OVERVIEW:

Review amount of time spent cleaning. Determine how much time is saved by implementing automation. Alter responsibilities of staff to increase productivity.

3 BATTERY STATUS:

Review battery life and stay up to date on charging status. Avoid downtime by keeping battery charged.

4 CONSUMABLES REVIEW:

Review consumable usage and proactively order parts. Avoid downtime by having parts on hand.

5 CONFIRMED CLEANING:

Confirm cleaning is complete across all managed locations. Save time by avoiding travel between managed properties or check-in's with BSC's. Share confirmed clean data with tenants and increase building occupancy.

1 LOCATION REVIEW:

Review time spent cleaning across locations. Compare performance and analyze processes at best performing site. Implement processes learned from the best performing site at other locations.

8 TRENDS

8 TRENDS:

Review trends in maintenance notifications and identify repeat notifications. Determine if staff needs additional training. Keep your machine up and running with continued daily maintenance.

7 REPORTING:

Review week over week, month over month, quarter over quarter cleaning performance to measure ongoing success and make necessary changes as needed.

6 GOALS SETUP:

Set and update cleaning goals. Use goals as motivation to increase the number of times a space is cleaned.

ICE ROBOTICS®

ABOUT ICE ROBOTICS

ICE Robotics® is the leader in cleaning automation and technology. ICE Robotics products like Cobi 18, an autonomous floor scrubber equipped with i-SYNERGY fleet management software, helps BSC's and Property Management companies manage cleaning and optimize building performance.
